

## OVERTONE ACOUSTICS BASS TRAP PANEL

### DESCRIPTION

Our Overtone Acoustics Bass Trap Panel provides a highly absorptive surface that is used to control and clean up low frequencies. The 4-inch panel depth significantly improves low-end absorption properties, helping to keep bass from being too “boomy”.

Installing these acoustical bass traps is quick and easy. They provide strong sound absorbing performance, durability, and elegant appearance. These panels are available in 3 PCF and 6 PCF densities and can be manufactured in sizes up to 4’ x 10’ with a fabric finishing of your choice.

### TECHNICAL SPECS

**SIZE:** Up to 4’ ft – 10’ ft

**THICKNESS:** 4” in

**CORE:** 3-6 PCF Fiberglass

**FABRIC:** Available as specified

**FIRE RATING:** Class A per ASTM E84

### FEATURES

- Reduces Echo and Reverb
- Excellent Low-Frequency Absorption
- Exceptional Acoustical Performance
- Durable, Impact-Resistant Substrate
- Dimensional Stability
